

You Are Made of Elements More than atoms... it's your nature

On Thursday, April 16, 2026, a distinguished interactive dialogue session titled:
You Are Made of Elements
More than atoms... it's your nature

was held under the patronage of the Head of the Chemistry Department, Dr. Ibrahim Mhadeat, and supervised by Dr. Taghreed Al-Jazazi, with the attendance of the event's guests, Dr. Samer Tannash from Middle East University, and the participation of Dr. Tareq Al-Shbool from the Department of Basic Sciences.

This event highlighted the idea that elements are not limited to the periodic table alone, but are an essential part of human nature, identity, and everyday life. The atmosphere was filled with meaningful dialogue and engaging interaction among the attendees. The event also included the installation of the new periodic table in the department, serving as a valuable scientific addition that reflects a sense of belonging to the discipline and contributes to creating a more inspiring and organized academic environment.

Special thanks and appreciation to everyone who contributed to organizing and making this event a success, and to all who were part of this memorable occasion.
